

PROJECT MANAGEMENT

Certificate 99-913-3

The Project Management Certificate focuses on the essential skills and knowledge needed to promote effective project leadership and management from inception to completion. This certificate is designed for individuals seeking career advancement or professional development in a variety of business, healthcare, construction/engineering, or IT careers. The certificate provides the learner with experiences to develop or enhance their leadership, team building, and communication skills that will allow them to lead and direct projects and teams.

The course of study follows the Project Management Body of Knowledge (PMBOK) created by the Project Management Institute.

Certificate Outcomes

- Apply project management processes
- Apply project leadership skills
- Develop project plans and status reports
- Apply scheduling/cost management skills
- Develop proficiency in Microsoft Project software
- Lead a real life project in a lab setting
